THURSDAY MORNING, OCTOBER 14. NATIONAL REPUBLICAN TICKET,

JAMES A. GARFIELD, OF OHIO. FOR VICE-PRESIDENT CHESTER A. ARTHUR,

Presidential Electors.

A. W. CAMPBELL, of Ohio County. JAS. L. MCLEAN, of Putnam County PASIONAL DISTRICT BLECT JOHN A. CAMPHELL, Hancock County A. M. PUUND TUNF, Upsbur County J. B. MENAGER, Mason county.

гол сонцина strict-JOHN A. HUTCHINSON, of Wood.

The country knows that the election of Garfield would mean manence and an assurance of stability.

many months of perplexity and of confusion. No Democrat is cunning enough to tell whether the soft money heresies ock administration, or whether the bard money views which a few of the clearereyed men of the party proclaim as a matter of rhetoric and of theory, will be applied; nor can any one predict whether the ultra free-trade extravagances of the dreamers who demand the abolition of all tariffs, will prevail, or the patched-up schemes which Randall and his class are willing to cast as a tub to the Pennsylva-

minimp to cast as a duto to the second and intelligible and has been approved by experience. The Lemocratic policy is and must continue for many months utterly chaotic and formless. Hancock can not the lemocratic policy is and some second can not the lemocratic policy is and some second can not the lemocratic policy is and we feel sure that your answer will be no, no, NO, a thousand times NO.

The Democratic platform declares for the lemocratic platfo mark it out. A Congressional caucus in which the South will be masters will in its own time, probably not until December, 1881, inform an anxious country what it may except. The only way in which an earlier decision can be annonneed is by an extra session of Congress next March or afterwards. Is there any thoughtful citizen who in the evil of a continued Democratic majority would want Congress let loose upon industry and trade in extra session? Considerations of this sort are leading

siness men everywhere and all men who depend for support upon the labor of their hands, to cling to that which is certain and stable. They do not want to risk everything upon the whims of a cancus and spent more money than the Demo strolled by the Hamptons and Becks and Lamars and Hills. They do not with them so openly as to arouse the sus-Hancock in civil affairs. They know Republican policy and the prosperity which it has brought. They, will not put all their interests at hazard by the overthrow of Republican administration. They can trust a Republican President and a Re-

It is said that one result of the Rev. Brooke's secession from the Church of England will be the publication of an essay by Mr. Matthew Arnold,

"it is not without a natural regret that I part from a communion in which I have served for more than twenty years, and from those old and dear associations which have been with me from my boyhood. And I must also feel some sadness for the larged many selections." And I must also feel some sadness for the loss of many who will my congregation and listen to me no more. But the time has come when at any cost I must say farewell, and look forward to a new and untried life, in which I pray I shall have the help and blersing of God. But when I look foward I cannot regret the parting —I am glad to be freed from compromise, glad to be able to speak unfettered by a system, glad to have a clear position, glad to pass out of an atmosphere which had become impossible to breathe because I was supposed, however I might assert the contrary, to believe all the doctrines of the Church of England in the way the church confessed them."

I control the election of a United States Senator. This State does not elect Control to the case and the senate and the state of senator. This State does not elect Control to the senate any sense and the senate will state of senator. This State does not elect Control to the result in this district, will depend on the general result of to-morrow's vote in Ohio, Indiana, and West Virginia. There is a great deal of excitement over the result in this county to-morrow. Both sides claim a majority. The Republicans have gained noticeably of late, principally on the tariff discussion.

A. W. Campbell, Editor Duly Intelligencer.

WHAT HAS KILLED THE DEMOCRACY Its want of Sympathy With the American Sympa

Judge Headley and others thanking God that they were back in the old Democratic ship of "Free Trade," etc. He determined while in Europe to investigate the labor and tariff questions. Here is some of his experience in Great Britain.

At Belfast, visiting the Broad Street Spinning Works, a concern employing 5,000 people, from the ages of ten years to sixty and seventy, I asked the manager, when I saw the lactory dismissed for dinner, if that was where these people live, pointing to a lot of one-story huts, arranged like a camp of an army, with narrow passing ways, near the factory? His answer was, "Yes, and the fathers, grandfathers and greatfathers of these children lived there before them." My reply, at that time, was: "Only those who went to America, as I did, when but nine years of age, and my father at fifty, have prospered in that free land, where laborers make happy homes for their children, and become good freemen themselves. From what you say, the same good fortune never awaits those who remain here." I then said, "How about the education of the little ones I see passing out in such hours per day for five months in they are tend to that." I said, "How," He replied: "We send them to school two hours per day for five months in they are commercial man—drummer as they are commercial man

were equal to them in all lines of manufacturing. But in every instance they would say, employer, manager and mechanic, that we may be equal, but we could not manufacture as cheap as they could, because our pay to the workingman and the mechanic was three times greater than they paid, and if we would take off our selfah protective tarif they would and could ruin our manufacturing interests, because they were the leading manufacturers of the world and thought it only right that the mother country should certinue to be the manufacturing portion of the world.

My answer to such remarks was:

the world.

My answer to such remarks was:
We cannot, and never will permit those tariffs to be removed. We have a republic, not a monarchy, not these Queens, Kings, Princes, and an immense arristocratic nobility to support and foster, and a grand army and navy to sustain.

To sustain our Government we do it by

our Government we do it by To sustain our Government we do it by education. Our mechanics' and laborers' children commence schooling at the age of six, and finish their sourcetton at an average of say, sixtees or seventeen years. In going loschool at the age of six they have shoes on their feet, warm clothes on their little bodies, and heads covered with comfortable hats.

ittle poure, am news to fortable hats.
Educated labor becomes better skilled mechanics than your ignorant labor; they think) more, and know as much more about governmental affairs, when they are seventien years of age than your unabout governmental affairs, when they are seventeen years of sge than your un-educated mechanic will at the age of thirty. They love their fathers and mothers more than you do, they take care of their sped parents. I know some of the poorest Irishmen who came to America twenty and thirty wars ago, who have twenty and thirty years ago, who have sons, some of our largest merchants many manence and an assurance of stability. With a Republican Congress the revenue laws and the financial will follow in the path which has brought such wealth and prosperity to all classes. Even without a Republican Congress, a Republican President can hold the Nation in its course and veto any rash and reckless assaults upon the conditions of financial integrity and productive stability.

The election of Hancock would mean many months of perplexity and of conmany months of perplexity and of conmany months of perplexity and of contact the conditions of the conditions of perplexity and of contact the conditions of the

If such is Europe, will you, workingmen of Cincinnati-irrespective of party-vote to forge the chains of a slavery placing you on the same ground that as is shown the people across the ocean are forced to occupy? Will you, loving your wives and children as you do, vote to take off your only safeguard, our present protective saff, so that all our manufactories and workshops will have to stop, or lower your wages to the same scale that your unfortunate fellow workmen in Europe have to submit to, so as to compete with

times NO.

The Democratic platform declares for "only tariff for revenue"—that is, to take off the protection now given to American goods—while the Republican platform, with unerring thunder, declares not only no for a revenue tariff, but also for a protective tariff, or one which prevents the cheap labor of Europe making paupers of our working people.

With these truths before you, will you heistate? Will you for an instant think of forging the chains which will make slaves of yourselves and your posterity for all time to come?

The destruction or crippling of hom manufactures would be the building u clared for Garfie'd and the Republican fully demonstrated by experience in this ticket. Mr. Morgan recently returned country. And there is no Nation—no commercial nation—that does not protect commercial nation-that does not protec its own industries. The Democratic party that prior to leaving Cincinnati he heard proposes that the United States shall be an exception to this rule; that it shall adop that they were back in the old Democrat- free trade principles in the interest of for

ons now. Nothing I could say wonld make my opinion better known than the lact that our people are doing well. I believe that if Garfield is elected our present prosperity will continue without interruption, and that we will advance in every branch of industry. I believe if Garfield is not elected all the good results of a long matured and now successful business will be immediately checked."

"You believe, then, that business would suffer by a change in the administration?"

"I believe most firmly that if Garfield be not elected the change would result in the suspension of business. How long that suspension would last I cannot say, but it would last until a new administration different in policy from the present would act. Business people know what to expect from a continuation of the policy of the present administration, and they would not know what to expect from a new one that involved a change of politics. They would be nervous from the time of the election, and business affairs would be a suspicion connected with a change that would work great injury—the would be a suspicion connected with a change that would work great injury—the would be unsettled for a long time. There would be a suspicion connected with a change that would work great injury—the suspicion that a change of policy might involve losses in some way not exactly understood. It would not destroy, but it would rather cripple some branches of business and retard others."

### A Strong Point Well Put.

When the aristocratic Democrats b South Carolina announce in their leading newspaper that they will not employ any one but a Democrat in any capacity, and won't hire even a kitchen servant unles won't hire even a kitchen servant unless she is the "wife, daughter or sister of a Democrat," then the pressure to make the South solid has brought them to strange degradation. The average Northern man would be as much ashamed of himself if anybody supposed him capable of such brutai meanness as he would be of stealing bread from the mouth of a starving child. Poor and ignorant as most of the black men at whom the threat is aimed probably are, they are more worthy of the name of centlemen than their former ably are, they are more worthy of the
